FOREWORD

This document is a bibliography of research related to vocational education on the national, State and local levels. The references represented are the materials assembled for the comprehensive "Report of The Analysis Group, HEW Vocational Education Review Task Force," prepared during the fall of 1970.

A majority of the studies listed in this bibliography are unpublished reports prepared under contract for the Department of Health, Education and Welfare. Additionally, materials have also been included that were prepared for Congressional Committees and for the Departments of Commerce, Labor and Defense.

Relevant evaluations and other studeis on vocational education are certainly varied in terms of subject, methodology and utility. I hope that "Vocational Education, A Bibliography of Research" will serve as a useful tool in your effort to learn more from the available materials and advance our comprehension of the complex dimensions facing us all as they relate to our efforts to improve the vocational training of youth and adults.
